Drone trajectory structure: signal vs noise
High vol / Low stc (block 2)
13 large + 2 small changes | mean jump = 14.2 | bag spread = 2.5
Low vol / High stc (block 1)
2 large + 13 small changes | mean jump = 4.0 | bag spread = 3.4
Position (0-100)
Trial
Bag (observed)
Drone (hidden state)
Large vs small state changes by condition
Mean count per block
Large changes (jump >= 6.4)
Small changes (jump < 6.4)
